Smoke and Carbon Monoxide Alarm Retrofit Verification

I, _____ (Print Property Owner's Name) and I,
_____ (Tenant's Name - if owner occupied write "Same") who
own and/or live in the dwelling located at _____,
(Address) verify that the smoke (effective 1-1-2011) and carbon monoxide alarms (effective 7-1-2011)
AND AS required by the 2016 California Residential Code (CRC) have been installed in the dwelling,
in compliance with the code and with the manufacturer's instructions and further that they have been
tested and do function properly.

In an effort to enhance life safety within dwellings, the CRC Sections R314 and R315, specifically for existing construction, requires that smoke and carbon monoxide alarms be installed in existing dwellings or sleeping units where a permit is issued for alteration, repairs or additions exceeding \$1,000 in value. Generally, the alarms must be hard wired with battery back-up and all alarms are to be interconnected. If the installation of the alarms will require the removal of wall or ceiling finishes or there is no access by means of attic, basement or crawl space, then the alarms may be solely battery operated and not interconnected. Alarms must be installed in all of the following locations within the existing dwelling:

- In each sleeping room. (Smoke Alarms only)
- Outside each separate sleeping area in the immediate vicinity of the bedroom.(both required)
- On each story level of the dwelling, including basements and habitable attic rooms. (both Required)

I have read and understand the above requirements and affirm by my signature, that all required Alarms mentioned above have been properly installed and tested. (Both signature lines below must be completed).

Signature of Owner and/or Tenant

Date

NOTE:

This is a Voluntary Smoke and Carbon Monoxide Alarm verification procedure. If you prefer a Building Inspector to perform the verification, you must arrange to have an adult present on the date of when the final inspection is requested.
