Argument in Favor of Measure H
(294 words – 300 word limit)

Perris is a great place to live and work. Families thrive in our innovative and inclusive community. City leaders are connected with residents and focused on delivering public services efficiently and effectively.

Measure H is good for Perris. After careful consideration, the City Council placed Measure H on the ballot to seek voter approval to sell the North Perris Water System and Downtown Water System. Currently, the City General Fund is subsidizing water service in these areas which could impact other vital public services across the community.

Putting taxpayer funds to work for the community: The money from the sale will be used to retire taxpayer debt and to fund parks and athletic fields. Passing Measure H brings millions to the City which will be reinvested for the public good.

Quality reliable water service: Measure H completes a competitive bidding process designed to identify a partner who would work with the City to provide quality service, maintain the water system and provide reasonable rates. Liberty Utilities has a national track record of quality, financial stability and working with the community they serve.

Capped water rates: The City and Liberty agreed to a contract that caps water rates for a decade. Rates will be similar with neighboring providers and future increases are limited. Residents benefit from a state-regulated Class A water provider that is held to the highest standards of performance.

A Yes Vote benefits the residents of Perris. Protecting taxpayer funds and providing quality public services is a top priority. Measure H will protect residents, provide water stability and ensure Perris has the best possible parks and athletic fields for families, kids and the community.

Please vote Yes on Measure H to ensure quality water service and protect taxpayers.
