FOR IMMEDIATE RELEASE

UPDATE: Perris Boulevard Street Repair and Sewer Improvements Work

PERRIS, Calif. (January 21, 2020) — As part of the Citywide Street Improvements Project, roadway repairs began along Perris Blvd on Monday, January 6th. Due to the nature of the repairs, one southbound lane along Perris Blvd (between Bowen Rd and Jarvis St) has been closed as improvements are underway.

The contributions to Perris Blvd (highlighted in red) include rehabilitation of a failed trench line and general road improvements. Pavement repairs has been completed and striping is scheduled to get underway later this week. Once this project concludes by the end of January 2020, Perris residents and commuters can expect a smoother ride down Perris Blvd.

Additionally, construction is underway for emergency sewer improvements project (highlighted in blue) at the Perris Blvd and Metz Rd location. This project also began Monday, January 6th and is nearing completion as well. Sewer improvements, along with manhole

construction, will make for better sewer drainage for nearby residents. Construction on the emergency sewer improvement project should conclude in early February 2020.

Lane closures down Perris Blvd are still in effect, and those transiting are encouraged to use

caution, follow traffic control, and expect minor delays when driving through these construction areas, or use alternative routes. Please contact the City Engineer's office at (951) 943-6504 for any questions related to this Perris Blvd roadway repairs project. Please contact the City's Public Work Department at (951) 657-3280 for any questions related to this sewer improvements project.
